RESPITE FOR THE WEARY · GOING LIVE

What I need from you to launch

The website and owner dashboard are built. To take real requests and real rent payments, **the house needs a few free accounts**. You create them with one business Gmail and send me that login, and I set everything up from there. I also need the real details of the house. Tick items off as you finish them.

● Needed before we can launch Others can follow soon after

One Gmail for everything

Create one Gmail account for the business, then use it to sign up for every service in section 1. That way all the accounts belong to the business and sit in one place. When you're done, you only need to send me that one login.

01 Set up the accounts

Every account below is free. Do them in this order. When you sign up, choose the free plan and skip any upgrade offers.

- [ ] **Create one Gmail for the business** LAUNCH

  Make a new Gmail account just for the house, for example `respiteforthweary@gmail.com`. Every other account below is opened with this Gmail, so everything stays in one place.

  - Add your phone number to it, so the account can be recovered
  - Write the password down somewhere safe

- [ ] **Stripe, for rent and deposit payments** LAUNCH

  Stripe takes card and bank payments and sends the money to your bank. Sign up at `stripe.com` with the business Gmail. There's no monthly fee; Stripe only takes a small cut of each payment.

  - Fill in the business details Stripe asks for: legal name, EIN (or SSN if you're a sole owner) and business address
  - Add the bank account rent should be paid into

- [ ] **Vercel, for the website** LAUNCH

  Sign up at `vercel.com` with the business Gmail. Choose the free Hobby plan.

- [ ] **Render, for the server behind the site** LAUNCH

  Sign up at `render.com` with the business Gmail. Stay on the free plan.

- [ ] **Neon, for the database** LAUNCH

  Sign up at `neon.tech` with the business Gmail. Stay on the free plan. This is where requests, residents and payments are stored.

- [ ] **Resend, for emails**

  Sign up at `resend.com` with the business Gmail. The free plan covers the emails the site sends: new requests, pay links and receipts.

- [ ] **Your web address (only if you already have one)**

  If you already own a web address, tell me where you bought it and send that login as well. If not, the site can launch for free on a `vercel.app` address.

- [ ] **Send me the Gmail login** LAUNCH

  Once everything above is done, send me the Gmail address and password. I'll take it from there and set everything up.

  - Send it by a phone call or a private message, not in a group chat
  - Google may text a code to your phone the first time I sign in. Please be ready to pass it on

02 Who runs the dashboard

The dashboard is where you see new requests, move people in and track rent.

- [ ] **The main owner login** LAUNCH

  The name and email of the person who'll sign in first. I'll create it, and you'll choose your own password when you first sign in.

- [ ] **Where alerts should go** LAUNCH

  The email inbox that gets "new room request" and "rent paid" messages. A shared inbox works well if more than one person answers.

- [ ] **Anyone else who needs access**

  Names and emails of house managers or partners who should also sign in.

03 The real house

The rooms, residents and photos on the site now are examples. I'll swap in yours before launch.

- [ ] **Each room** LAUNCH

  - Name, and which floor it's on
  - Private or shared, and how many beds
  - Private or shared bathroom
  - Monthly rent and deposit (examples now: `$650–$950` rent, `$250–$300` deposit)
  - What's in it: furnished, grab bars, no stairs, desk and so on
  - Any bed that opens up on a set date

- [ ] **Current residents** LAUNCH

  So they show up in the dashboard and get pay links. Please share this as a spreadsheet **over a private channel**, not by plain email.

  - Name, phone, email (if they have one)
  - Which bed, move-in date, monthly rent
  - Anything they owe right now

- [ ] **Photos**

  Each room, the kitchen, living areas, porch and the outside of the house. Phone photos are fine: daytime, lights on, landscape. No residents in the shots unless they've agreed in writing.

04 How rent works

The system bills rent automatically each month. Tell me your rules so it matches how you already run the house.

- [ ] **Billing day and due date** LAUNCH

  Right now next month's rent is billed on the `25th` and due on the `1st`. Is that right?

- [ ] **Late fees**

  Is there a late fee? How much, and after how many days? For now you add these by hand in the dashboard.

- [ ] **Card fees**

  Stripe charges about `2.9% + 30¢` per card payment and less for bank payments. Do you absorb that, or nudge residents toward bank payments?

- [ ] **Checks, cash and deposit refunds**

  Who records check or cash payments in the dashboard, and what's the rule for returning deposits when someone moves out?

05 Check what the site says

Please read these and tell me what's wrong. Families and case workers will rely on them.

- [ ] **Phone number** LAUNCH

  The site lists `804-803-6248` everywhere. Is that the number people should call?

- [ ] **Location**

  The site says the house is about `15 minutes` from the Richmond VA Medical Center. Is that accurate? Should the site show the neighborhood, or keep the address private until a tour?

- [ ] **The promises in the FAQ** LAUNCH

  - Rent includes a furnished room, utilities, Wi-Fi, laundry, kitchen, rides and help with services
  - The whole house is drug- and alcohol-free
  - No nursing staff on site; residents manage their own daily care
  - VA benefits, SSI and SSDI are accepted
  - Move-in is often within a week of a tour

- [ ] **Programs and partners**

  The site offers three kinds of stay: veterans, recovery (sober living) and independent seniors. Are all three real? List any certifications, licenses or partner agencies the site can name. They help a lot with case workers.

06 Legal and privacy

These are your decisions. A short review with a lawyer is worth it.

- [ ] **Privacy policy and terms** LAUNCH

  The request form asks about recovery, veteran status and age, which is sensitive information. The site needs a privacy policy that says what you collect, who sees it and how long you keep it. Send me the text, or approve a draft I write.

- [ ] **Fair-housing review**

  The site is written for specific groups of people. Have someone check the wording follows fair-housing rules.

- [ ] **Lease or house agreement**

  Do residents sign something today? Tell me whether it should stay on paper or be linked from the resident's pay page.

What happens next

1. You create the Gmail and the free accounts in section 1, and send me the Gmail login.
2. You send the house details from sections 2 to 4.
3. I load everything and run a real `$1` payment from start to finish, then refund it.
4. You read the live site once more, and we go public.

The items marked Launch are what hold up the go-live date. Everything else can follow in the first few weeks.
